

**General Purpose Snow Sensor
MODEL CIT™- 1 Snow Sensor**

BENEFITS

- Minimum snow melting costs
- No supervision required

FEATURES

- Reliable snow sensing
- Senses both temperature and precipitation
- Application flexibility
- Simple installation
- Field proven in thousands of installations

DESCRIPTION

The CIT™- 1 Snow Sensor detects falling or blowing snow as precipitation at temperatures below 38°F(3.3° C). The CIT™- 1 provides the industry's most versatile and cost effective automatic snow melting control when used with either an APS™- 3A or APS™- 3B Control Panel.

Reliability and sensitivity are key CIT™- 1 features. The solid state design combined with a rugged aluminum housing and epoxy potting ensure many years of trouble free service. Precision precipitation and temperature sensors ensure snow detection accuracy.

Typical applications include controlling snow melting systems for sidewalks, doorways, stairs, loading docks, ramps for the physically challenged and parking garages. Easy installation is another key CIT™- 1 feature. Low voltage operation, up to 2000' (609.6m) separation from the control panel, mast or roof mounting, and non-critical extension wiring are just a few of the features making this possible.

ORDERING INFORMATION

Order Number	Description
10001	CIT-1 Snow Sensor

LIMITED WARRANTY

ETI's two year limited warranty covering defects in workmanship and materials applies. Contact Customer Service for complete warranty information.
